

Due to the position of the float level mechanism, the gauge is monitoring the last 50% of liquid level in the cylinder.

Halfway in the green, the cylinder is approximately 40% full.

In the yellow, the cylinder is approximately 30% full.

In the red, the cylinder has 18% or less gas.

Filler Valve with 80% shut-off device

PLEASE NOTE
The detachable contents gauge will ONLY fit the LEFT side of the valve (see below)

Operation of the Gaslow Contents Gauge

Connecting To The Refillable Gas Supply

Autogas is Propane, however, on the continent, a small amount of Butane is added - so for pre-2004 vans using Butane, you will need to change your regulator and fit one of the following:

Propane Manual Changeover (01-1650-refill)

Propane Auto Changeover (01-1655-refill)

Propane Electra 1000 (01-1840-refill)

If you are already using Propane you can convert your existing regulator with a Propane Adapter and Gauge (01- 4330).

If you have a Propane changeover, simply change the high pressure hoses.

For new vans fitted with a 30mbar caravan regulator and using 7Kg Butane cylinders, simply remove the clip-on adapter. If using Propane, change the high pressure hose(s) to an 01-6010

Imported vans with German regulator connections will fit directly on to the refillable cylinder (washer required)

Your cylinders are manufactured to European Standard EN1442 and each one has its own unique certificate and identification stamped into the bottom foot shroud of the cylinder.

IMPORTANT: Please note the retest date which, on the above example is 2019. This cylinder **MUST** be returned to your local dealer or contact us direct to exchange the cylinder for a new one during that year as it shows that our 15 year warranty has run out.

Each cylinder has two valves - one which allows 80% filling of the cylinder and prevents overfilling. The second valve has a 21.8 x 1/14LH outlet to DIN477 with safety relief and is for vapour draw-off. Both valves have been tested and approved to European Directive 99/36/EC.

STAINLESS STEEL HOSES

Your stainless steel hose is manufactured to EN 10380, has no perishable rubber in its construction and carries a 15 Year warranty.
